FeedStation Walk-In

Open, robust and modular concentrate feeding station for any barn

The FeedStation Walk-In is an out-of-parlour feeder with an open layout, robust construction, and a clever modular design. Thanks to the integrated PipeFeeder and easy installation, the system is ready for immediate use and can be effortlessly expanded to fit any barn.

See how the
FeedStation Walk-In works here

The FeedStation Walk-In

- fits in any barn and works with any feeding computer
- comes standard with an anti-spill PipeFeeder
- has an open design, keeping the cow in contact with the herd
- is easy to expand in a modular way

- Robust and modular design
- Accurate and precise feeding with the PipeFeeder
- Anti-spill system prevents cows from pushing for extra feed
- Expandable with pneumatic or electric closing gate
- Only one side gate needed per additional station

Open Layout for Calm, Natural Behaviour
The FeedStation Walk-In is designed with cow comfort in mind. Thanks to its open layout, cows maintain visual contact with the herd, leading to calmer, more confident feeding behaviour. This reduces stress and improves throughput at the feeding station.

Universal Compatibility and Scalable Design
Built to be robust and durable, the FeedStation Walk-In is compatible with every feed computer. Its modular construction allows for easy expansion, each additional station requires only one side gate. This makes scaling up both cost-effective and hassle-free, making it an ideal solutions for growing farms or stall renovations.

Precise Feeding with PipeFeeder, Optional Closing Gate
Every FeedStation includes a quiet and accurate PipeFeeder with an anti-spill system to reduce waste and disputes at the trough. For enhanced control and a calmer environment, you can optionally add a pneumatic or electric closing gate.
