MultiDos HighSpeed

Fast and precise liquid dosing

The MultiDos HighSpeed enables the precise dosing of liquid additives, vitamins or energy at a rate of up to 1.5 litres per minute – ideal for use in rotary milking parlours, feeding robots or feed mixers.

See how the
MultiDos HighSpeed works here

The MultiDos HighSpeed

- doses liquids up to 1.5 litres per minute
- helps farmers save time and optimises feeding processes
- combines high speed with outstanding precision
- is suitable for rotary parlours, feeding robots and feed mixers

- High dosing capacity of up to 1.5 litres/minute
- Precise and fast, even with large volumes
- Suitable for various feeding systems
- Time-saving and efficient
- Robust and reliable in use

Fast and Accurate Dosing
The MultiDos HighSpeed is the faster version of our well-known MultiDos liquid doser. Just like the standard model, it delivers outstanding accuracy, but this model excels in speed: dosing up to 1.5 litres per minute. It is ideal for situations where large volumes of liquids, suchs as vitamins or additives, need to be dispensed quickly and reliably.

Versatile Application
Whether dosing liquids in the rotary parlour, adding them to a feed mixer, or using them in a feeding robot, the MultiDos HighSpeed is highly versatile. It enhances efficiency across a wide range of feeding and mixing processes.

Efficient and User-Friendly
The MultiDos HighSpeed is easy to install and operate, delivering reliable performance under all conditions. With its robust construction and smart technology, it saves time, minimises errors and optimises your farm operations.
