MultiFrame

Robust milking parlour frame with integrated stainless steel feed trough

The MultiFrame is a practical and durable frame for herringbone milking parlours with an angle of 30° to 70°. The integrated stainless steel feed trough is specially shaped to suit the cow's natural feeding behaviour, helps prevents feed loss, and is easy to clean.

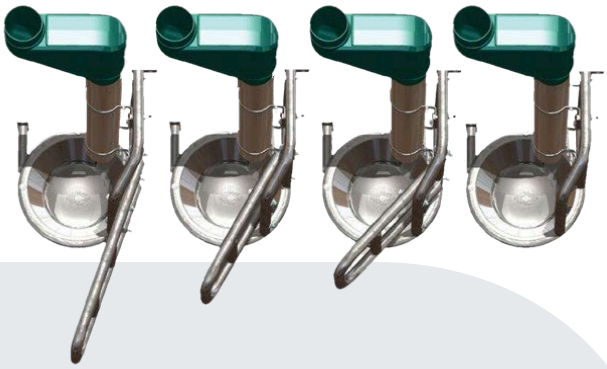
MultiFrame works here

The MultiFrame

- ✓ fits any herringbone parlour with an angle from 30° to 70°
- ✓ is designed for optimal cow comfort and efficient feed intake
- ✓ is easy to clean thanks to its perforated stainless steel trough
- ✓ Can be combined with the PipeFeeder, no extra drilling required



- Positions the cow correctly
- Perfectly aligned with the cow's natural eating position
- Quick and easy to install on any existing system
- Available in both left- and right-hand versions
- Optional: mounting rail with hammerhead bolts for easy placement

Robust and Well-Thought-Out Design
The MultiFrame is a robust and smartly designed frame with an integrated stainless steel feed trough. Specially developed for herringbone parlours with an angle from 30° to 70°. The perforated base of the feed trough ensures that the concentrate remains in the trough, while moisture from cleaning the milking parlour drains away immediately through the perforations. This contributes to hygiene, feed efficiency and a better working environment.

Anatomically shaped feed trough
The shape and dimensions of the trough are precisely tailored to the cow's anatomy. Thanks to this perfect fit, the cow stands in the correct position and can comfortably eat her feed. This prevents spillage and supports the cow's natural feeding behaviour.

Easy to Install and Versatile to Use
The MultiFrame is easy to install in any existing milking parlour. It is available in both left- and right-hand versions and fits all types of installations. Pre-drilled holes allow the PipeFeeder to be mounted directly, without extra drilling.

Optionally available
An optional mounting rail with matching hammerhead bolts allows the frames to slide along the wall and be precisely positioned to match your cows and parlour layout.
